### IMPORTANT SAFETY WARNING

Prolonged continuous operation of an amplifier, speaker, or subwoofer in a distorted, clipped or over-powered manner can cause your audio system to overheat, possibly catching fire and resulting in serious damage to your components and/or vehicle. Amplifiers require up to 4 inches (10cm) open ventilation.

### CHECK THE LOAD

The CompRT Down-Firing Subwoofer Systems have an impedance of 2 ohms. Check to see if your amplifier is optimized to drive the load of your TRTP enclosure.

### TRTP ENCLOSURES

The TRTP-series enclosures combine KICKER's award-winning line of CompRT subwoofers with computer-modeled and human fine-tuned enclosures to offer a level of bass performance never before thought possible from a commercially available, thin-profile, ready-to-install subwoofer system. The TRTP8 Enclosure features an 8 inch CompRT Subwoofer, the TRTP10 Enclosure features a 10 inch CompRT Subwoofer, and the TRTP12 Enclosure features a 12 inch CompRT Subwoofer.

Plug your subwoofer speaker wire into the terminals using the red connector as positive and the black connector as negative. Connect the other end of the wire to your subwoofer amplifier in accordance with its owner's manual.

**Pro Tip:** With a KICKER KXA amplifier, a pair of KICKER KSC speakers, and a few KICKER cables, you're looking at a full system upgrade that will dominate! KICKER amplifiers, speakers, and accessories make it easy to upgrade with your existing or stock source unit. Ask your dealer about KICKER amplifiers and speaker upgrades to complete your system!

**Sound Check:** *Poor bass response?* Check the system phasing by reversing the positive and negative speaker connections on the subwoofer enclosure. If the bass improves, then the subwoofer was out of phase in reference to the rest of the audio system.

### **IMPORTANT SAFETY WARNING**

To avoid potential injury or possible death from forward movement of the enclosure during abrupt stops or accidents, the enclosure must be properly installed and securely fastened to your vehicle. You are solely responsible for securely fastening the enclosure in your vehicle. Make sure the mounting screws will not puncture the gas tank/brake lines/wiring or interfere with any mechanical parts on the underside of the mounting surface.

**Note:** All specifications and performance figures are subject to change. Please visit [www.kicker.com](http://www.kicker.com) for the most current information. To get the best performance from your new KICKER Subwoofer, we recommend using genuine KICKER Accessories and Wiring. Please allow two weeks of break-in time for the subwoofer to reach optimum performance.

The use of a subsonic filter will significantly increase power handling. The power handling specification in this chart is calculated using a 25Hz, 24dB/octave subsonic filter.
